

Name _____

Due date: Tuesday, May 14

For your Endangered Species Fact Sheet project, you will need to select three species that interest you from the U.S. Endangered Species List.

You will choose three species that must meet the following criteria:

- Listed as endangered within the boundaries of the continental United States
- Choose land animals or aquatic – but only aquatic within lakes or rivers of the U.S., not oceanic species

Directions:

1. Go to the [website](#) (link is on Mrs. Riazi's school website) and find three animals within the vertebrate or invertebrate animals lists.
2. Click on any of these categories:

Vertebrate Animals	Invertebrate Animals
<ul style="list-style-type: none">• Mammals• Birds• Reptiles• Amphibians• Fishes	<ul style="list-style-type: none">• Clams• Snails• Insects• Arachnids• Crustaceans• Corals

2. Research different species who have the listing status as E, such as the bobwhite (a bird) in the example:

Common name	Scientific name	Where listed	Lead region	Listing status
Bobwhite, masked (quail)	<i>Colinus virginianus ridgwayi</i>	Wherever found	2	E

3. Click on the animal's scientific name and ensure that your animal is located within the continental United States (no Hawaiian species, which are the region 1 species)

4. List the type of animal, common name and scientific name below:

Common Name	Scientific Name	Type of Animal (i.e. mammal, bird, etc.)
